

BRINGING YOU THE RESULTS:

In order to achieve the industry leading performance we demand, we partnered with Sherwin Williams to develop IsoTek™, a specialized treated sealant technology.

The objective of conducting ASTM testing was to determine the level of mildew growth present after four weeks of exposure in an accelerated mildew chamber.

ANALYTICAL RESULTS: This graph represents a comparative performance analysis of RealTrim™ Treated after four weeks of exposure in an accelerated mildew chamber.

	REALTRIM™ TREATED BY WOODTONE	OTHER TREATED WOOD TRIM	UNTREATED WOOD TRIM
WARRANTY LENGTH	25 Year Limited	20 Year Limited	0-15 Year Limited
TECHNOLOGY	Treated Sealant	Waterbased Treatment	None
TREATMENT DEVELOPMENT	Engineered for Woodtone	Generic	None
ENVIRONMENTAL PERFORMANCE	Western SPF 100% renewable	Mixed Wood Species	Mixed Wood Species
LENGTH STRUCTURE	8'-24'	8'-20'	8'-20'

THE TREATED TRIM DIFFERENCE:

- IsoTek™, the first step of our two-step treatment technology has been engineered in partnership with **Sherwin Williams®**. It was developed exclusively to achieve the industry leading performance Woodtone demands.
- RealTrim™ Treated features an industry leading 25 year warranty against rot, mold, mildew and fungus. This warranty is backed by Sherwin Williams®.
- This proprietary treated sealant protects the surface of the wood without infusing the substrate with water, which could potentially compromise the substrate structure and accelerate fungi growth.
- RealTrim™ Treated is created from a high quality, consistent Western SPF substrate, a renewable resource that requires much less energy to create than engineered products.

FREQUENTLY ASKED QUESTIONS:

What is the treatment process of RealTrim™ Treated?

RealTrim™ Treated IsoTek™, a proprietary treated sealant technology developed in partnership with the largest coating manufacturer in North America, Sherwin Williams®. IsoTek™ is the first step in our two-step process and it forms the backbone of our RealTrim™ Treated system.

What does the treatment protect against?

IsoTek™ sealant technology protects against mold, mildew, rot and fungus for a period of 25 years, as long as the installation instructions are followed properly. Please see warranty information for more details at woodtone.com.

Is RealTrim™ Treated made from the same substrate as RealTrim™ Plus?

Yes, this new and improved product has all the great qualities of the trim you know and trust, with many additional benefits.

How should RealTrim™ Treated be top coated?

To keep the warranty intact, RealTrim™ Treated must be top coated with two coats of latex or acrylic paint in the field. Woodtone can complete the top coating in our controlled coating facility if you so choose.

How should end-cuts be sealed in the field?

To keep the warranty intact, end-cuts must be sealed using 2 coats of latex primer or top coat. The proprietary sealant technology is not required on end-cuts. Please refer to installation instructions

Is RealTrim™ Treated manufactured in North America?

Yes, RealTrim Treated is manufactured at multiple Woodtone facilities in North America.

Is RealTrim™ Treated an environmentally friendly product?

This product is created from a Western SPF, renewable resource, unlike composite products that require much more energy to manufacture. In addition, the coating technology is a ultra-low VOC product, ensuring the environment is better protected than applying a primer in the field.

Where is RealTrim™ Treated available and what is the lead time?

We sell our products through distribution to all 50 states in the US. Please contact Woodtone directly for your closest distributor at 1-800-663-9844.
